

New Hygienitech Process Brings Relief To Allergy Sufferers (As seen on the “Oprah Show”)

If you or anyone in your family is suffering from allergies, the problem may very well be the dust mites that have made a home for themselves in your mattress. Allergy sufferers, representing one out of every four Americans, can now find a new source of relief. It is not available at the local pharmacy and not prescribed by medical practitioners. It is a treatment that is performed right in their own home.

A joint conference of the American and Canadian Lung Associations held in May 2000 reported that microscopic dust mites, feeding on dead skin flakes that accumulate in the typical bedroom mattress are causing allergy and asthma attacks at alarming levels.

Their findings, along with extensive medical evidence, indicates that dust mites excrete a compound called **Guanine** which has been found to be the dominant cause of most allergies and other widespread maladies such as asthma, eczema, hay fever, bronchitis, inflammation of the mucous membranes, itchy red eyes, headaches, fatigue and depression.

While this report might be a revelation to most Americans, the fact is that Europeans have been aware of these findings for many years, which is why the business of destroying dust mites, cleaning and sanitizing mattresses have grown to the point where there are more than 4000 dealers performing this service in tens of thousands of European homes and commercial locations on a regular basis.

“When I first read about the business of destroying dust mites and sanitizing mattresses,” said Barry Wilson, owner of Wilson Pest Control of Cabot, “I was somewhat surprised to learn just how effective and how simple it was to perform this type of service, and it fits right in with the pest control business.”

Barry Wilson, who has been in the pest control business for many years, is convinced that his company should be the one to bring this low cost and highly effective process to the people of the Cabot, Jacksonville and Beebe areas.

“When I witnessed first hand what the Hygienitech Mattress Cleaning And Sanitizing process extracted from a relatively new mattress, followed by an allergen detection test which clearly indicated the level of contamination,” Barry Wilson went on to say, “I was not only certain that this was an excellent and much needed service, but I could not wait to get home and perform the process on my own mattress.”

This scientifically proven method of killing dust mites, and extracting them along with all their fecal matter and other debris, is a patented process that uses UV-C lights, high-frequency sound waves and powerful suction to achieve amazing results.

The Hygienitech Mattress Cleaning and Sanitizing process is an all natural, chemical free, dry treatment that is safe for all types of mattresses. Barry Wilson, owner of Wilson Pest Control and the Dust Mite Clinic offers a free in-home allergen test that only takes a few minutes to perform.

About the company

Wilson Pest Control has been serving Cabot, Jacksonville and Beebe for almost 40 years. One of their main goals over the years has been to eliminate any infestation with only one treatment. Mr. Wilson said that type of goal takes a lot of experience, many types of insecticides and all of the latest technology at hand.

Mr. Wilson said the business has always been in the family. His uncle James Odell Wilson began the company in 1965, and Bobby Wilson, James' brother and Barry's father, joined in a few years

later. After a few years, James developed heart problems and had to retire, and later passed on. Bobby Wilson worked diligently for many years but also developed health problems the last few years, and in late 2003 also passed away after a year of struggling with cancer.

Barry Wilson started working with his father killing bugs at about the age of 9. At the age of 19, he purchased Sebring Hair Design Center in Cabot, and worked that business for about 12 years.

Later, Barry decided to go back to his first love, killing bugs. Barry Wilson has since taken over Wilson Pest Control Co. and has added on the service of dust mite elimination, a wonderful service for allergy sufferers. Mr. Wilson prays that his many dedicated customers over the past many years will be in support of this new add-on service.
